Using Features to Create Solutions

Features don't create value, solutions do! Each feature in the portal is tied to a solution, and making that connection is the difference between an average deployment and a great one.

Most fleet management tracking goals fall into one or more of these categories: **Increase Productivity**, **Increase Efficiency**, **Exceed Customer Expectations**, and **Build Community Value**. Use these case videos to see examples of solutions to real-world challenges that you can apply to your own business to reduce costs, reduce risk, and increase revenue.

Increase Productivity
