Device Script Updates 2/12/2021

Link: https://help.wextelematics.com/device-script-updates-2-12-2021/ Last Updated: February 12th, 2021

The following device scripts have been updated with new features.

GPSI-5000 Inputs

- Seatbelt (5000) Input 3
- Seatbelt (5000) Input 4
 - Added support to report seatbelt buckled/unbuckled status from hardwired seatbelt monitoring kits.
 - Seatbelt reporting/alerting is still in beta testing, and not available for everyone. Please coordinate with your Account Rep if interested.
