In order to view, create or edit Custom Metrics and Scorecard Reports, a user must have the following access privileges:

- Custom Metrics enabled in the User Permission List.
- User Permissions for Metrics enabled in Menu-Access for individual users.

User Permission List | Custom Metrics

- 1. From the portal main menu, click **Account** and then click **Manage Users**.
- 2. In the Additional Options menu, select **Permissions for individual users** (opens in a new browser Tab).
- 3. Click the checkbox to enable **Custom Metrics** for a user.

Note. To view the Utilization Rollup, a user must also have **Hierarchy Admin** enabled in the User Permissions List.

- 1. In the top menu bar, select Category: Custom and click the filter button.
- 2. Scorecards involve up to 3 of the available User Permissions for Metrics:
 - **Manage Metrics** = the user can *create*, *edit* and *delete* custom metrics.
 - **Scorecard Configuration** = the user can *configure* scorecards.
 - **Metrics Report** = the user can *view* and *run* custom metrics reports. End users need this checkbox enabled if they will be viewing reports ONLY.

- 1. In the top menu bar, select Category: **Dashlets** and click the **filter** button.
- 2. Click the checkbox to enable **Utilization Rollup** for a user.

Note. Metrics are shared by all users who have access to them. Please consider that users can edit/delete/view each other's metrics and any changes are global. In order to run a traditional Metric Report, a user must have the **Metrics Scorecard** option enabled in the Menu Access List , Category: **Report**.
