

Link: https://help.wextelematics.com/docs/about-vehicles/defining-and-managing-switch-inputs/ Last Updated: March 30th, 2023

For devices that support inputs, you can select inputs and define new switch inputs directly from the Portal.

Note. The applicable input add-on must be installed for your supported device prior to selecting inputs in the Portal to collect and transmit the relevant input data.

Selecting an Input

You can select switch inputs for existing vehicles equipped with supported devices directly from the Classic Portal.

How to select an input:

GPSINSIGHT	-:		Ð			£			a	- Back to	Home 👩 Open	in standard Help Cente	GPS Insigh r Log Out

1. From the top navigation bar in the Classic Portal, click Account.

The drop-down menu expands.

2. Click Manage Vehicles, then Open.

The Manage Vehicles and Groups page appears.

3. In the Vehicle List section, locate the vehicle for which you would like to set up inputs and click the corresponding Edit icon (

The Edit Vehicle Details page appears.

4. In the Switch Inputs section next to Assign:, click Input.

The Assign Input pop-up appears.

Link: https://help.wextelematics.com/docs/about-vehicles/defining-and-managing-switch-inputs/ Last Updated: March 30th, 2023

- 5. Use the drop-down next to the applicable input number (1-4) to select the switch for the input(s).
- 6. Click Assign.

Defining a Switch

You can define switch inputs for existing vehicles equipped with supported devices directly from the Classic Portal.

How to define a switch:

GPS INSIGH		- 🍦 😵 Mapping o 🛛	Reports d	More O	Ac	count 🖸	Safety	но	IS/ELD		test	•	201

1. From the top navigation bar in the Classic Portal, click Account.

The drop-down menu expands.

2. Click Manage Vehicles, then Open.

The Manage Vehicles and Groups page appears.

3. In the Vehicle List section, locate the vehicle for which you would like to define a switch and click the

corresponding Edit icon (🖉).

The Edit Vehicle Details page appears.

4. In the Switch Inputs section next to *Define New:*, click **Switch**.

The Enter Switch Information pop-up appears.

5. Enter the following information:

Link: https://help.wextelematics.com/docs/about-vehicles/defining-and-managing-switch-inputs/ Last Updated: March 30th, 2023

- Label
- On State
- Off State
- 6. Click Create Input.
- 7. You may then select the newly defined switch for the vehicle by following the steps listed under Selecting an Input.

Deleting an Input

You can delete switch inputs for existing vehicles equipped with supported devices directly from the Classic Portal.

Note. Inputs cannot be edited and instead must be deleted and then subsequently added. This is to avoid accidental changes that may affect input tracking across the fleet.

How to delete an input:
