Driveri Release 10/24/2022

The following release for Driveri is available for Driveri customers now.

What's New

Portal Updates

- **Configurations – Usability Enhancements**
  The user experience on the Provisioning & Configurations > Configurations and Provisioning & Configurations > Vehicles > Configurations pages is improved to make it clear as to whether the configurations are "View Only" or can be edited. This will decrease confusion when users log in with roles that do not have permission to modify the configurations.
