

Here's what's new for Driveri!

## What's New

### Portal

#### **Reports Central - Groups field added to all Reports**

The Groups field was earlier available only for a few reports in Reports Central. With the introduction of the Vehicles in Groups feature, there was a requirement to include Group information in all reports so that users can access group-focused information. The Groups field is now available in the following reports:

- Managed Coaching Sessions Report
- Driver Status Report
- Device Health Report
- Active Vehicle Device Association Report
- Active Devices Report
- Restricted Hours Driving Report
- Unassigned Drive Time Report

#### **Railroad Crossing Alert made Regular from Beta**

- The Railroad Crossing Alert is made Regular from the previous Beta status. This Alert will be enabled for a Fleet on request. Please coordinate with your account manager to enable this Alert.
- This Alert has no impact on the GreenZone Score. The impact of this Alert on GreenZone Score will be supported in future releases.
