ELD Flex Portal & Server Release 1/14/2022

Link: https://help.wextelematics.com/eld-flex-portal-server-release-1-14-2022/ Last Updated: January 14th, 2022

This Release Notes announcement is for ELD with Flex users.

What's New

Portal

Data Transfer Page:

- Ability to select a subset of drivers or a subset of vehicles when doing FMCSA/CCMTA data transfer

Accounts Management Page:

- Displaying a default value for Country and State fields upon adding an account

Canada Regulations:

- Ability to reassign accepted Unidentified Driving event to the unique unidentified driver account (Logs page)
- Ability to reassign driving time records between team drivers and allows each co-driver to confirm the change for the corrective action to take effect (Logs page)
- Allow Canadian drivers to view only 6 months duration of logs (Canadian Drivers Portal)

Bug Fixes
Portal Fixes:

- Fixed an issue where the Status' color wass displayed as red (On Duty/Driving) even if the driver has enough hours left when in Canadian ruleset [Drivers Page]
- Fixed an issue where the status displays in red when the driver has no break time limit [Drivers Page]
- Fixed an issue where the month set on the DVIR Data Retention was not reflecting on the DVIR History page
- Fixed an issue where the portal freezes when viewing a specific driver
- Fixed an issue where an error "Shortening of Driving event" was still occurring even when editing the Odometer value only
- Fixed an issue where the Start Time of Day was incorrect in the exported CSV [Drivers Management Page]
- Fixed an issue where the 'CDL Issuing State' field was being required upon creating/editing a driver with a

DVIR product only [Drivers Management Page]

- Fixed an issue where the portal User Interface>Refresh Rate set to 'Never' still refreshes after 2 minutes

- Fixed an issue where the following remarks/events were not being hidden when in AOBRD mode [Logs Page]:
  – Authenticate/Unauthenticate remarks
  – Border Crossing remarks
  – Add exception/remove exception
  – Deactivated events
  – Edited status

- Fixed an issue where the Vehicle Information's Total Mileage was incorrect due to the Start of Day Odometer value was not being acquired as the end odometer for the calculation [Logs Page]

- Fixed an issue where the Uncertified Logs report PDF was always empty [HOS Reports – Certified Logs]

- Fixed an issue where the image attachment icon only links to one image despite having multiple images [DVIR History Page]

Server Fixes:

- Fixed an issue where a user with no PERM_VIEW_ALL_TERMINALS permission cannot save and certify DVIR [DVIR History Page – Mechanic Signature Dialog]

- Fixed the issue on uploading Fuel Receipts with empty 'State' via CSV would display 'resolved' value on the State column [State Mileage – Fuel Receipts Page]

- Fixed an issue where the odometer offset was not being included on the Mileage by State Report [Mileage by State Report]

- Fixed an issue where the Start of Day Odometer event was not being included on the Mileage by State Report calculation [Mileage by State Report]

- Fixed an issue where uploading Drivers with invalid 'Region' value was not being validated [Drivers Management Page]

- Fixed an issue where event data checks were not properly calculated [Canada Regulations Data Transfer>ELD CSV Output Files]
