ELD Flex Portal & Server Release Notes 8/9/2021

This Release Notes announcement is for ELD with Flex users.

What's New

Portal & Server Updates

Portal:

- Driver's Portal – Logs page
  – Update to grid chart for the excluded drive time. The normally green line will now show dark grey if the drive time was excluded for the purpose of adjusting time to violation clocks

- Equipment Management page
  – Ability to add Vehicle and Trailer names with 1 character only

Server:

- DVIR History page – DVIR PDF
  – Additional statement with the signatures: "I Certify these entries are true and correct:" and translated to French language: "Je certifie que ces informations sont justes et correctes:"

Bug Fixes

Portal:

- Fixed an issue where the Driver filter displays a specific driver instead of the default filter "All Drivers" for accounts with less than 300 drivers

- Fixed an issue where the Logs page is unresponsive when viewing a driver's logs with lots of violations

- Fixed an issue where the Push Event time test button does not convert to UTC when sending test data

- Fixed an issue where the Time remaining is incorrect in the application when Adverse Driving Conditions exception is removed via portal>Logs page

- Driver's Portal & Certified Driver's Logs PDF
  – Fixed newly discovered rounding issue on the Grid Chart Total Hours

Server:

- DVIR History page – DVIR PDF
  – Fixed an issue where the compliance statement: "This inspection complies with the national safety code standard 13 schedule 1" is not translated to French language when using Canadian ruleset
