This Release Notes announcement highlights new hardware updates.

Accel/Decel – GPS Accessory

- Added support to revert acceleration/deceleration reporting to GPS-based monitoring from diagnostic-based monitoring.
- This update is valuable for users with mixed hardwired and diagnostic installed devices, and wish to have all accel/decel reflect similar values (GPS).

Note. Updating to GPS-based accel/decel introduces the potential for the device to report exaggerated values.

Please coordinate with our Support team to have your devices updated.
