Driveri D-215 (2 Camera) Quick Connect

The installation kit contains an installation guide, but please refer to this online guide as they differ, one Driveri D-215 device, one mounting bracket, one power cable, one AD-1/2/3, one diagnostic cable, eight 8" cable ties, and cleaning wipes.

App installation verification and registration is required, so please visit the App store on your smartphone and download the Driveri Installer App.

Driveri Installer

Additional tools and supplies you will need include dashboard panel removers, a smartphone, a digital multimeter, a cordless drill, 5/16" in. (8 mm) driver bit, a T10 and T20 security Torx bit, a side cutter, a heat gun, hand roller, electrical tape, a dry/clean/lint-free cloth, dry erase/wax tip marker and a tamper seal compound.

Installation Steps

The following steps provide an overview of the installation process:

- 1. Install Preparation.
- 2. Mounting Preparation.
- 3. Device Installation.
- 4. Verify and Registration.
- 5. Frequently Asked Questions.

1. Install preparation.

- 1. All water/ice/snow should be completely removed from the windshield if applicable.
 - a. If the outside temperature is 75 degrees Fahrenheit (24 degrees Celsius) or less, turn on vehicle defrost until the windshield is warm to the touch.
 - b. Also, place the mounting bracket in defrost airflow to warm VHB tape.
- 2. Record the 10-digit device serial number (S/N) onto your paperwork.

Driveri D-215 (2 Camera) Quick Connect

3. Remove a-pillar plastic and dashboard panels for harness installation.

- 4. Ensure the key is removed from the ignition, and using a digital multimeter, test for constant power at the port:
 - a. 9-Pin Diagnostic Connector: Place the positive probe on Pin B and the negative probe on Pin A.
 - b. 16-Pin Diagnostic Connector: Place the positive probe on Pin 16 and the negative probe on Pin 4.

2. Mounting Preparation.

Mounting location is dependent on windshield type. For other windshield types, please see FAQ section at the end of this guide.

- 1. Type 1: Rear View Mirror (Standard)
 - a. Clean bracket mounting area with Alcohol wipe.
 - b. Wipe clean with clean dry cloth.
 - c. From the bottom of the mirror anchor go ~ 1 "in. down and place mark.
 - d. Apply heat to burn off any leftover residue.

Link: https://help.wextelematics.com/installation-guide/driveri-d-215-2-camera-quick-connect/ Last Updated: July 21st, 2023

Note. Excessive heat may cause delamination of the windshield or cracking. Continuously move heat gun to not apply heat in one area for too long.

3. Device Installation.

1. Bracket Mounting

- a. Remove the plastic exposing the VHB adhesive.
- b. Apply heat to the tape. If using butane, lightly heat the bracket metal vs. the tape.
- c. Ensuring bracket is level, and left bracket arm is inline with windshield mark, press firmly to the windshield.
- d. Using a hand roller, roll the entire bracket applying firm pressure removing all air bubbles.

Link: https://help.wextelematics.com/installation-guide/driveri-d-215-2-camera-quick-connect/ Last Updated: July 21st, 2023

From outside the vehicle, visually inspect tape adhesion. There should be no air bubbles in the tape. If necessary, repeat the rolling process until required results are achieved.

Note. Mounting brackets are one time use and should be thrown away after removal. Please

Device Mounting

a. Mount device in bracket and tighten screws finger tight.

Note. The internal-facing camera has a lens cover and an LED on both sides of the camera lens.

Cable Routing

- a. Route cable along mirror wires and secure with cable ties.
- b. Stuff cabling between vehicle roof and headliner.
- c. Secure cable along A-Pillar wires; behind airbag if applicable.

Device Connections

- a. Free up the existing diagnostic port from its current location in the vehicle and plug the pass-thru cable connector into the vehicle's diagnostic port.
- b. Mount the replacement diagnostic port.

c. Connect device cable to AD-1/2/3 and then connect AD-1/2/3 to the Diagnostic Bypass Cable. Tape off spare white wire to existing harness as this wire is not needed in quick-connect installations.

1. 4. Verification and Registration.

1. Confirm LED lights are facing inwards, put both visors down, in the vertical position, and if applicable pull-out visor extensions.

Link: https://help.wextelematics.com/installation-guide/driveri-d-215-2-camera-quick-connect/ Last Updated: July 21st, 2023

Note. Unless instructed to leave lens cover on the device, please remove and place it in the vehicle glove box.

2. With the vehicle Off, open the 'Driveri Installer' app and follow the prompts to connect the Driveri to your smartphone.
