Release Notes 2/14/2024

This Product Release Notes announcement includes notification of updates for Hardware & Accessories.

Accessories

Introducing the Driveri Hub-X

Driveri Hub-X is an accessory to the Driveri safety camera(s), enabling fleets of any size to expand their visibility inside and outside any type of vehicle. Supporting up to four cameras, Driveri Hub-X drastically reduces your fleet's blind spots and takes the effectiveness of your safety camera program to a whole new level.

Typical deployments include buses, tractor/trailers, box trucks, garbage trucks, and other "larger" vehicles where added visibility can provide greater context for safety and exoneration purposes.

If you would like to learn more, please visit: About Driveri Hub-X.
